

All Dimensions nominal and will be subject to change on chassis/cab

TRAINING

Central to Whale's success is not only the training of its staff but also the provision of structured training for its product. This meets the changing needs of today's Indian water and sewage infrastructures. The company is also respected for its onsite commissioning of all new products.

QUALITY

Whale Enterprise cares about quality across all aspects of its business. Indeed it is a word that characterises the company. Whale complies to ISO 9001 : 2015 and all Whale products fully comply with all relevant legislation and regulations. It also has the benefit from being supported by its UK parent company Whale Tankers the largest manufacturer of vacuum tankers and jetting equipment in Europe.

STOCK SWEEPERS, UK SUPPORT

One of Whale's primary objectives is to maximise operating performance by keeping downtime to an absolute minimum, leading to significantly reduce whole life costs. This is achieved by ensuring we can provide service support. As a consequence Whale has entered into an agreement with Stock Sweepers a UK based manufacturer to supply new road sweepers across the Indian sub-continent, as well as supplying parts and technical support. Whale stock an extensive range of appropriate parts.

Whale Enterprise manufacture a wide range of products and vehicle types and provide many other services. For a copy of any of the following brochures or for further information, either call on: +91 95009 45511. Email us at: sales@whaleenterprise.in, or visit our website at: www.whaleenterprise.in

Reliability, Service, Value ... for Life

KING OF SWEEPERS

Versatile and robust - the road sweeper that's built to last

WHAT YOU NEED TO KNOW

Built to Last

The S6400 has been designed to last! The mild and stainless steel components that we use are thicker than the road sweeper industry standard, to ensure the longest life span possible. All equipment is precision fabricated, then powder-primed and coated, to give an extremely durable and high quality finish.

6.5m³ Capacity

Standard twin-discharge system comes with every Stock Sweeper. Should the auxiliary engine PTO (power take-off) fail, our equipment has its own independent electrical discharge system for additional use, if needed.

CANbus Operating System

The touch sensitive control panel is conveniently mounted near the operator's side window, helping to reduce the level of distraction to the operator to an absolute minimum. Full control simply rests at the operators finger tips.

Body, Cowl and Rear Door - Stainless Steel

The body, cowl, and rear door are fully built with corrosion and abrasion-resistant stainless steel.

1600L of Clean Water

1600L as standard, with optional 250L - 4000L additional water tanks available.*

Double-Strength Subframe and Tipping Hinges

We know our sweepers have to be robust, and critical to the stability of the vehicle is its subframe and tipping hinges. Twice the typical steel is used, to ensure maximum stability on uneven ground.

*Chassis dependant

High Pressure Spray System

TECHNICAL SPECIFICATION

Truck chassis	16 tonnes
Material	Stainless steel (body, cowl and door)
Auxiliary engine	63kW @ 2200 rpm
GVW hopper	6.5m ³ with twin-discharge system (auxiliary engine operation)
Sweep format	Single side sweep with wide sweep 'belly' brush and suction nozzle
Brush size	500 mm
Sweep path	Max 2450 mm
Sweep speed	2 to 16 kph
CANbus intelligent sweep system	Operator friendly electronic controls
Auxiliary fuel tank	160 litres
Clean water tank	1600 litres stainless steel tank
Low pressure dust suppression water system	35 litres/min at 3.5 bar (50 PSI)
Lighting	Front: 4 Side: 3 (2 in nozzle box, 1 in channel brush) High level rear LED work lights and low level LED reversing lights

OPTIONAL

Sweep format	Dual side sweep (left and right) with wide sweep 'belly' brush and dual suction nozzles
Brush size	650 mm
Sweep path	Max 3650 rpm
Brush motor	High powered brush motor
Gully sucker	6" or 8"
Throttle	Variable throttle options
High pressure spray system	30 litres/min at 150 bar (2200 PSI) with hand lance gun
Lighting	Beacons LED
Camera	Reverse camera and sensors
Additional spray system	One each side on channel brush
Litta snatch	6" hose, 8 m long (accessibility 4 m)
