WHALE MINI SCOOP

The Whale Bolero Pick-Up De-Silting Machine is a compact, hydraulically operated, vehicle-mounted de-silting equipment designed for efficient cleaning of open drains, storm water channels, irrigation canals, and roadside drainage systems.

Engineered for operation in congested urban environments, the machine combines a powerful articulated hydraulic boom, perforated de-silting bucket, integrated hydraulic tipping hopper, and four-point stabilizer system to deliver safe, reliable, and productive drain maintenance.

The compact dimensions of the Bolero Pick-Up enable access to narrow streets, residential colonies, industrial premises, and municipal roads where larger excavators cannot operate efficiently.

Technical Specifications

Machine Type	Hydraulic Vehicle Mounted De-Silting Machine
Mounting	Mahindra Bolero Pick-Up
Operating System	Fully Hydraulic
Maximum Digging Depth	Up to 3.0 m
Maximum Working Radius	3.65 m (Approx.)
Bucket Capacity	Up to 50 kg / 0.05 m³
Bucket Type	Perforated De-Silting Bucket
Bucket Material	High Strength Steel
Bucket Operation	Hydraulic
Boom Construction	Fabricated High Tensile Steel
Boom Movements	Hydraulic – 4 Cylinders
Slewing Angle	150° (Approx.)
Hydraulic Pump	Gear Pump
Pump Capacity	27 L/min (Maximum)
Working Pressure	150 Bar
Hydraulic Tank Capacity	Approx. 45 Litres
Hydraulic Filter	Return Line Filter
Control Valve	8-Bank Directional Valve
Side Shift (Lateral Box Stroke)	600 mm (Approx.)
Rear Stabilizers	2 Hydraulic Outriggers
Front Stabilizers	2 Hydraulic Outriggers
Hopper Capacity	500 Litras
Hopper Operation	Hydraulic Tipping
Paint Finish	Epoxy Primer + Polyurethane Top Coat
